# KWIZDA AGRO.

Kwizda Agro is your reliable, sustainable partner when it comes to plant protection and plant nutrition in agriculture, at home and in the garden. We consider it our mission to make innovations from our global network available to international industry, farmers and consumers via regional distribution markets. A balance between a dynamic approach and scientific evidence forms the foundation for the development of innovative plant protection products and solutions.

## AT A GLANCE

## ORGANIZATION

# TECHNOLOGY & PRODUCT DEVELOPMENT.

In Technology & Product Development, Kwizda Agro mainly focuses on “green” solutions for sustainable plant protection products and biocides. Uniquely combining our in-depth market knowledge and our expertise about biology and high-value formulations with regulatory competence, we guide projects from initiation to commercialization and ensure end-to-end responsibility. Market awareness is a cornerstone, ensuring our products fully meet the needs of our customers and create long-term value to the market. When we are screening new ideas and solutions, assessing innovative biological formulations and developing new formulations and processes, we never stop striving for excellence using the full range of our proven experience and competencies enriched by the knowledge of our wide network.

**Complete asset management** from **early development** through to **commercialization** in **Europe** and **NORAM**.

Combining **market knowledge, expertise** about **biology** and **high-value formulations** with **regulatory competence**.

**Focus** on “**green**” **solutions** for **sustainable plant protection products** and **biocides**.

# OPERATIONS.

The two production plants in Leobendorf and Val d'Izé form the heart of production at Kwizda Agro. Always at the forefront of technology and steadily striving for further development, Kwizda Agro offers high production standards, filling and packing of insecticides, fungicides, herbicides and biological products. Rounded off by logistics services, including storage, commissioning and transport, and our optimized supply chain management, we at Kwizda Agro stand for comprehensive production processing at the highest level. As quality is always our first priority, we ensure this through continuously developed state-of-the-art quality management and wisely deployed quality assurance and quality control activities.

management.**

# CROP SOLUTIONS.

With more than 150 sales, product management and marketing employees in Austria, Germany, Hungary, Romania and the United States, we are equipped with a technically skilled and highly effective network to deliver within our markets. This structure enables us to directly offer crop protection and plant nutrition innovations to more than 10,000 farmers in Central Europe, Southeastern Europe and North America. We have access to the portfolios of all well-known suppliers and aggregate findings generated from international research, regional markets and in-house trial programs to deliver recommendations specifically tailored to local needs. Our resources enable us to integrate solutions into our portfolio in order to maximize innovation, efficiency and sustainability for organic and conventional crop protection products, special fertilizers and plant strengthening agents. Our consultants work directly with farmers onsite, adapting all recommendations to local needs and conditions for added value.

# INDUSTRIAL SOLUTIONS.

Industrial Solutions at Kwizda Agro encompasses two prominent business segments: Biocides and Tolling. Equipped with a wealth of experience and high-end expertise, they both know and capably serve their customers' expectations and needs, always striving to continuously develop and improve. They understand and meet customer expectations and needs, relentlessly pursuing ongoing enhancement. Biocides is a leader in formulations with naturally derived actives and sustainable packing solutions and serves customer demands in the relevant European markets. Tolling serves as the gateway to Europe for developing and manufacturing complex, high-quality conventional formulations and biologicals, leveraging a robust network and renowned technological leadership.

**40+ years** of **experience** in **formulation development** and **manufacturing**.

**Best industry partner** for **global key players** and **innovators**.

**Proven safety** and **quality track record**.

**Clear plan** for **sustainable solutions** in an **intact and productive living environment**.
